THE MARKET CAPTURING A GROWING MARKET OPPORTUNITY

Collectively, the WB6 ecosystem will have over 900 start-ups by 2026 at a 10% growth rate

Potential Output Growth in WB6

COMPETITIVE LANDSCAPE

STANDING OUT IN THE NON EU PART OF THE BALKANS

These start-up sub-sectors represent key opportunities based on global trends, current start-up activity and our expertise

| | WB6 Industry Strengths | Global Landscape |
|--------------|--|------------------|
| \mathbf{x} | Applied Blockchain Serbia- Blockchain is a fast-growing subsector with high value potential that has already started to develop in Serbia. Continuing to focus on Blockchain as a sub-sector can lead to a regional niche for the WB6. | High Growth |
| Ŕ | Gaming & Digital Entertainment Serbia & Bosnia and Herzegovina- A highly profitable sub-sector, leading gaming companies in Serbia have already begun to establish a local niche in Gaming. Digital entertainment in general represents an opportunity for highly specialized talent in the WB6 region to add significant value to overall GDP. | High Growth |
| | Gov Tech, Public Services Low government efficiency, high public employment. Growth potential is high to introduce digital solutions to public services, massive market. | Growth Market |
| Î. | Fashion Tech, E-commerce & Supply Chain North Macedonia, Kosovo, Albania, Montenegro- Capitalize on traditional craftmanship in fashion by connecting to global supply chains to sell to Western markets utilizing E-commerce platforms. | Local Niche |

COMPETITIVE LANDSCAPE

STANDING OUT IN THE NON EU PART OF THE BALKANS

A combined WB6 ecosystem will also see the exponential effects of Output growth on scale-up and job creation

| _ | | Start-up Output 2021 | Output Growth Rate ¹ | Start-up Output in 2026 | Employment Generated: Start-ups ² | Employment Generated: Scale-ups | Total Direct Employment | Total Indirect Employment ³ | |
|---|---------------------------|-------------------------|------------------------------------|-------------------------------|--|---------------------------------------|----------------------------|---|--------|
| | Current Scenario: 2021 | 570 | | | 3,420 | 527 | 3,947 | 15,787 | 19,733 |
| | Vision 2026 | 570 | 10% | 918 | 5,508 | 2,205 | 7,713 | 30,852 | 38,565 |

In 2026, the WB6 start-up ecosystem can generate ~18,800 jobs by fostering a cohesive ecosystem and driving startup and scale-up creation

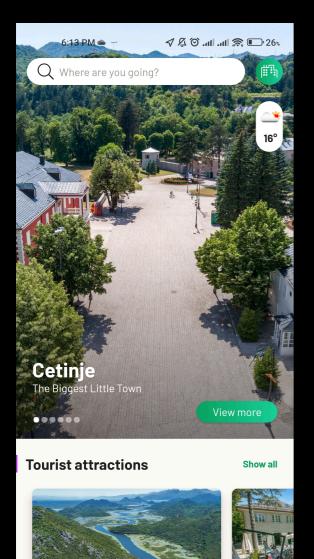

Output Growth Rate determined based on fast-growing but small (less than 100 start-ups) ecosystems

WB6 start-ups generate about 5.75 jobs per start-up (Startup Genome survey based on Serbia)

Scale-ups in early-stage ecosystems generate an average of about 105 jobs per company (Startup Genome research)

Indirect Employment refers to the creation of additional support jobs for every job created. Technology-driven industries have one of the highest multipliers at around 4X (Kauffman Foundation & MIT Sloan)
